

Specifications

| Monitored Voltage: | $\begin{aligned} & 100-120 \mathrm{~V}, 200-240 \mathrm{~V}, \\ & 380-415 \mathrm{~V}, 440-460 \mathrm{~V} \text {, } \\ & 480 \mathrm{VAC} 40-70 \mathrm{~Hz} \\ & \text { (Fuse } 0,5 \mathrm{~A} \text { ) } \end{aligned}$ |
| :---: | :---: |
| Optional Separate Auxiliary Voltage AC: | $\begin{aligned} & 100-120 \mathrm{~V}, 200-240 \mathrm{~V}, \\ & 380-415 \mathrm{~V}, 440-460 \mathrm{~V} \text {, } \\ & 480 \mathrm{VAC} 40-70 \mathrm{~Hz} \\ & \text { (Fuse } 0,5 \mathrm{~A} \text { ) } \end{aligned}$ |
| Optional Separate Auxiliary Voltage DC: | 24-60VDC (Fuse 0,5A) <br> 110-220VDC (Fuse 1A) |
| Supply tolerance: | +10\%, -20\% |
| Power rating: | 5 VA |
| Current Input: | 1A CT or 5A CT, <0,1VA |
| Contact rating: | AC: 100VA -250V/2A max. DC: 50W -100V/1A max. |
| Adjustments: | Depending on the selected model (See table on the right) |
| Frequency range: (Other range on request) | $\begin{aligned} & 45-55 \mathrm{~Hz} \\ & 55-65 \mathrm{~Hz} \\ & 45-65 \mathrm{~Hz} \\ & 30-70 \mathrm{~Hz} \end{aligned}$ |
| Analogue output 1: (see page 2 for available outputs) | mA : Up to $20 \mathrm{~mA}, \max 500 \mathrm{R}$ V: Up to $10 \mathrm{~V}, \min 100 \mathrm{kohm}$ (other on request) |
| Analogue output 2: (see page 2 for available outputs) | mA : Up to $20 \mathrm{~mA}, \max 500 \mathrm{R}$ V: Up to 10V, min 500ohm (other on request) |
| Accuracy: | Class 0,5 |
| Temperature: | -20 to $+70^{\circ} \mathrm{C}$ |
| Humidity, relative: | 0-95\% |
| Weight: | 0.6kgs |
| Front protection: | IP21 |
| Flammability: | UL94-V0 |

The unit meets EN 60255-27 Cat. III, Pollution degree 2 and the relevant environmental and EMC tests specified in EN 60255-26 to comply with the requirements of the major Classification Societies.

Related information:
The KCFV53x series are also available for panel mounting as KPFV53x series.

- Under and Over Voltage and Frequency Protection
- Adjustable Voltage and Frequency Deviation Set points
- The Pathfinder function eases fault finding
- Up to two individual very fast analogue output signals (<50mS), (optional)
- DIN96 Slave Indicator with Hz scale (optional)

## Description

The digitally controlled KCFV53x is for use on three phase, three wire systems. KCFV53x provides precision monitoring of frequency and line voltage on any generator system. When trip delays are set to zero ( $0,1 \mathrm{sec}$ ) operation corresponds with G59 requirements.

User settable trip levels and delays. LEDs flash during count-down. Colour of LEDs indicates alarm status.

The Pathfinder (only on latching models) indicates the phase (s) causing the trip by the flashing pattern of the relevant LED.

Up to two individual very fast analogue output signals (optional)

proportional to Hz range (see page 2 for available outputs). The analogue output is isolated from both voltage input and auxiliary power.

## Relay Configurations

Less than 50 mS fault detection. R1 (Under \& Over Frequency) and R2 (Under \& Over Voltage) activates when set level is exceeded and time delay has elapsed. R3 activates when R1 or R2 is activated and can be used as a common alarm.

## Connection Diagram

*Reset
Any latched relay is reset by linking terminals 12 and 13 or by interrupting the auxiliary voltage supply.

## Analogue Output

The output signals are proportional to the meter reading (see page 1 for an overview of models and functions).

The signal is specifically intended as an input to a control system for monitoring or control.

Add suffix from table below to type designation to specify output required:

Outputs 1
Outputs 2

| O/P1 | $\mathbf{0 - 1 0 \mathrm { mA }}$ | O/P11 | $0-10 \mathrm{~mA}$ |
